

# Message to Interns Website Typography Guidelines

Hi Team,

For consistency and user-friendly design across our course-selling website, please follow these font size and style guidelines:

## Font Styles

- Primary Font: Poppins or Inter - clean and modern, ideal for readability.
- Fallback Fonts: sans-serif (for cross-browser compatibility)

## Font Sizes (Responsive Design Friendly)

Element	Desktop	Mobile	Font Weight
Website Title / Logo	28-36px	24-28px	700 (Bold)
Main Headings (H1)	32-40px	26-30px	700
Subheadings (H2)	24-28px	20-24px	600
Section Titles (H3)	20-22px	18-20px	600
Paragraph Text	16-18px	15-16px	400
Course Titles	20-24px	18-20px	600
Course Price / CTA Button	18-20px	16-18px	600-700
Footer / Small Text	12-14px	12px	400

## Line Height & Spacing

- Line height: 1.5-1.8x the font size (for readability)
- Letter spacing: Slight increase (0.5px) for headings

Use Tailwind CSS or your chosen framework's utility classes to implement these values.

Make sure the design remains clean, minimal, and mobile-friendly.

Let me know once youve applied this.

Thanks!
